SAMUEL PETER

Software, DevOps & Cloud Engineer | Critical Infrastructure & Reliability

Uyo, Nigeria | samuel.peter@iu-study.org | +234 802 828 7784

samuelpeter.dev | github.com/sampeter-akan | LinkedIn

PROFESSIONAL SUMMARY

Software, DevOps and Cloud Engineering practitioner pursuing an MSc in DevOps & Cloud Computing, with a First Class Honours computing degree and 20+ years of progressive critical-infrastructure operations leadership. Builds software projects using TypeScript, Python, Java, React, REST APIs, CI/CD and cloud services. Brings hands-on experience in troubleshooting, automated testing, system monitoring, incident response and technical documentation. Seeking software engineering opportunities where dependable delivery and rigorous problem-solving matter.

TECHNICAL SKILLS

Programming & frameworks: TypeScript, JavaScript, Python, Java, React, Node.js, FastAPI, REST APIs, OpenAPI, HTML/CSS

Cloud, delivery & tooling: AWS, Docker, Kubernetes, Terraform, Git, GitHub Actions, Jenkins, Maven, Vercel, Supabase, PostgreSQL

Quality & operations: JUnit, Selenium, k6, CI/CD, automated validation, monitoring, incident response, RCA, EMS/SCADA

SELECTED SOFTWARE ENGINEERING PROJECTS

VAULT FIVE | Real-Time Multiplayer Web Application

TypeScript | Vite | Supabase Edge Functions | PostgreSQL | Realtime | GitHub Actions | Vercel

- Built a browser-based room-code multiplayer game with anonymous access, synchronized rounds and serverless orchestration across devices.
- Implemented version-controlled delivery and CI checks; documented architecture, game lifecycle and operational runbooks.

Repository: github.com/sampeter-akan/vault-five

GridPulse 330 | Power Grid Telemetry & Contingency Simulation

React 19 | TypeScript | Tailwind CSS 4 | Vite 8 | Vercel

- Engineered an interactive SCADA/EMS-style simulation of 330 kV grid telemetry, threshold alerts, contingency logic and operator responses.
- Modelled load rejection, Ferranti overvoltage and dispatch playbooks; added sequence-of-events logs for traceable incident review.

Repository: github.com/sampeter-akan/gridpulse-330app

Movies API | Contract-First Microservices

TypeScript | Node.js | OpenAPI v3 | k6 | GitHub Actions

- Built REST services against an explicit API contract with automated validation and CI/CD; used repeatable k6 performance tests to examine endpoint behavior.

Repository: github.com/sampeter-akan/movies-api

Credit Loan Calculator | Automated Build & Test Pipeline

Java | Jenkins | Maven | Selenium | JUnit | GitHub Actions

- Implemented automated build and test stages, dependency update automation and structured logging to support maintainable delivery.

Repository: github.com/sampeter-akan/credit-loan-calculator

HomeStayGrid | ML Recommender Feed

Python | FastAPI | Docker | AWS ECR | Elastic Beanstalk

- Built and deployed a containerized ML recommender prototype for maintenance prioritization using AWS deployment workflows.

Repository: github.com/sampeter-akan/homestaygrid_ml_recommender_feed

PROFESSIONAL EXPERIENCE

Transmission Company of Nigeria (TCN) | Grid System Operations | Jun 2005–Present

Principal Manager (Jul 2025–Present) | Senior Manager (Jul 2021–Jun 2025) | Manager (Jul 2018–Jun 2021)

- Lead monitoring, incident response, operational risk and change governance in national high-voltage transmission operations; support service availability reported at 99.9%+.
- Directed incident analysis and corrective actions associated with approximately 30% lower outage impact; trained 15+ operators and developed operating runbooks.

Assistant Manager (Jan 2015–Jun 2018) | Officer I (Jul 2011–Dec 2014) | Officer II (Jun 2005–Jun 2011)

- Progressed through 24/7 control-room operations, switching coordination, event tracking, escalation, restoration support and operational documentation.

EDUCATION

MSc DevOps & Cloud Computing | IU International University of Applied Sciences, Germany | In progress

Current GPA: 80.5% | DevOps Engineering: 96% | Advanced Research Methods: 90% | Cloud Computing Project: 84%

BSc (Hons) Computing & Information Technologies | University of Derby, UK | 2020 | First Class Honours

BTEC Level 5 HND, Computing and Systems Development | Pearson RDI, UK | 2014

LANGUAGES

English (C1) | Efik/Ibibio (Native)
